

Connect models to written methods

2026-09-28 | Grade 5 | 45 minutes

Learning focus

Use equivalent fractions to add unlike denominators. Explain calculations and context while recording actual help.

00-05 min

Recall equivalent parts

Use an equal-whole bar to explain why changing both numerator and denominator preserves a fraction.

05-13 min

Connect a model and calculation

Model a fresh unlike-denominator sum with strips, then write the matching equivalent-fraction steps.

13-25 min

Practice matching representations

Pairs solve fresh sums and connect each renamed fraction to equal-sized parts in their models.

25-40 min

Word problems

Use ten minutes for the three-question Word problems assignment. Record actual help. Discuss the context and units in the remaining five minutes.

40-45 min

Explain a common unit

Students explain why the addends must count the same-sized parts before addition.

Review current evidence before changing this plan. The assessment stays fixed on October 2.
