

Review evidence and prepare for assessment

2026-10-01 | Grade 5 | 45 minutes

Learning focus

Use equivalent fractions to add unlike denominators. Explain calculations and context while recording actual help.

00-05 min

Recall the common unit

Use a short example to recall equal-sized wholes and equivalent fractional parts.

05-13 min

Explain a complete solution

Model an inspectable calculation, a reasonable total and a word-problem unit without rehearsing assessment items.

13-25 min

Review through practice

Students work on fresh examples while the teacher uses reviewed September 30 work to select brief support or extension.

25-40 min

Apply and discuss

Solve new fraction-addition contexts. Ask students to explain their method and record the help they receive.

40-45 min

Name the next check

Students show a short calculation or question for a teacher conference. Keep the October 2 assessment date fixed.

Review current evidence before changing this plan. The assessment stays fixed on October 2.
